E15 is an ethanol-blended fuel comprised of 15% **ethanol** and 85% **gasoline**. Since 2011, E15 has provided consumers with a higher-octane, lower-priced fuel.

### E15: Safe to Use

The U.S. Environmental Protection Agency (EPA) approves E15 for use in all passenger **vehicles model year 2001 and newer**, as well as Flex Fuel Vehicles (FFVs).

### Why E15?

Using ethanol in the U.S. fuel marketplace helps lower gasoline prices by expanding gasoline supplies – giving consumers a choice – and reducing our dependency on importing petroleum or crude oil.

### At the Pump

Easy to find and easy to use. All E15 pumps will include this label, required by the Environmental Protection Agency (EPA) and the Federal Trade Commission (FTC).

**E15 should NOT be used in:**

- Model year 2000 or older vehicles
- Motorcycles
- All off-road vehicles (such as boats and snowmobiles)
- All off-road equipment (including lawn mowers and chainsaws)
- Vehicles with heavy-duty engines

Funded with Indiana corn checkoff dollars.

---

**Automaker Approval of E15**
